

WARNING

READ BEFORE ENTERING!

Entering this fire damaged area can expose you to chemicals or hazardous substances known to cause cancer, birth defects or other harm.

These substances may include but are not limited to asbestos, heavy metals such as lead, arsenic, or mercury, polycyclic aromatic hydrocarbons, furans, dioxins, hydrogen cyanide, sulphur dioxide, toxic volatile organic compounds, respirable ultra-fine particulate matter, mold, and many other hazardous substances.

These substances may cause acute and/or chronic sickness or disease when inhaled, absorbed by the skin, or ingested.

WEAR PROPER PERSONAL PROTECTIVE EQUIPMENT BEFORE ENTERING AND AVOID PROLONGED EXPOSURE!
